PROJECTS

Employee Management System

REPO LINK:- [EMPLOYEE-MANAGEMENT-SYSTEM](#)

The Employee Management System (EMS) is a web-based application developed using React.js with Vite and Tailwind CSS to efficiently manage employee records within an organization. The system provides a user-friendly interface that allows administrators to add, view, update employee information in a structured and secure manner.

Gallery App – Mini Project

REPO LINK:- [GALLERY-PROJECT](#)

Developed a responsive Gallery Application using React.js and Tailwind CSS that displays images in a clean grid layout with smooth UI interactions. Implemented reusable components and responsive design principles to enhance user experience across devices.

Notes App – Mini Project

REPO LINK:- [NOTES-APP](#)

Built a Notes Application using React.js and Tailwind CSS that allows users to create, edit, and delete notes efficiently. Focused on component based architecture, state management, and a minimal, user-friendly interface.
